ABOUT ME

Team Lead and software developer with 3+ years of experience in full-stack engineering and Cloud DevOps. Currently leading the engineering team at Techloset Solutions — driving its technical direction, architecture and delivery. Specialized in architecting scalable MERN stack ecosystems, enterprise-grade LMS platforms, and custom AI integrations involving local LLMs. Proven track record of automating deployment lifecycles through CI/CD pipelines across AWS and Azure, ensuring high availability, performance, and secure delivery for production-grade applications.

SKILLS

Frontend: JavaScript | Next.js | React.js | React Native | TypeScript | GraphQL | Redux | Zustand | Tailwind CSS | HTML/CSS | GSAP | Three.js | Framer Motion | SEO | Mixpanel | Auth0

Backend: Node.js | Express.js | Prisma | JWT | Firebase Functions | REST APIs

Database: PostgreSQL | MongoDB | MySQL | SQL

AI: Local LLMs | LLM fine-tuning | Claude API | Hugging Face | FastAPI

Cloud & DevOps: AWS | Azure | Digital Ocean | Vercel | CI/CD pipelines | Observability

Tools & Platforms: Jira | Firebase | Figma | Jest | Postman | Bootstrap | Supabase | Stripe | Apple/Google Pay | GitHub | Notion

Leadership: Technical architecture | Infrastructure planning | Team leadership | Mentoring

WORK EXPERIENCE

TEAM LEAD

Techloset Solutions | Jul 2026 – Present | Faisalabad, Pakistan

- Leading the engineering team and its technical direction across full-stack, mobile and AI workstreams.
- Direct technical architecture and infrastructure planning across concurrent client projects — enterprise LMS platforms, AI integrations and SaaS products.
- Oversee deployment lifecycles delivered through CI/CD pipelines across AWS and Azure.
- Grow engineering leadership capacity and mentor developers across the stack.

SENIOR SOFTWARE DEVELOPER

Techloset Solutions | Feb 2026 – Apr 2026 | Faisalabad, Pakistan

- Delivered enterprise-grade full-stack, mobile, AI, DevOps, and systems integration solutions across SaaS, hospitality, education, ordering, and automation platforms.
- Orchestrated a complex integration for Big Bear Cabins using the exclusive Streamline API to synchronize property management, reservation, and availability data.
- Engineered and maintained automated CI/CD pipelines to streamline deployments across AWS and Azure environments.
- Architected and deployed large-scale Learning Management Systems (LMS) featuring complex user hierarchies, secure video delivery, and backend workflow automation.
- Integrated and fine-tuned local Large Language Models (LLMs) to enable offline-first AI capabilities and client-controlled AI workflows.
- Delivered high-impact projects involving sensitive intellectual property under strict confidentiality and security requirements.
- Optimized backend performance, database interaction patterns, and developer workflows using modern ORMs such as Prisma.
- Improved production reliability through enhanced observability, maintainable service architecture, and disciplined deployment practices.
- Collaborated with cross-functional teams to deliver scalable, maintainable, and production-ready software solutions aligned with business objectives.

SOFTWARE DEVELOPER

Techloset Solutions | Feb 2025 – Jan 2026 | Faisalabad, Pakistan

- Developed dynamic and responsive systems using the MERN stack, TypeScript, and Tailwind CSS.
- Translated complex business requirements into scalable technical solutions across frontend, backend, and cloud layers.
- Collaborated with product and engineering teams to ship maintainable software features in production environments.

JUNIOR DEVELOPER

Techloset Solutions | Jan 2024 – Feb 2025 | Faisalabad, Pakistan

- Contributed to MERN-stack client projects across the full development lifecycle.

FULL-STACK DEVELOPER

Techloset Solutions | Aug 2023 – Jan 2024 | Faisalabad, Pakistan

- Built and shipped full-stack features for client projects at Techloset.

INTERN

SEERAHT | Feb 2023 – Jan 2024 | Faisalabad, Pakistan

- Completed hands-on training in full-stack development, working on real-world projects and strengthening JavaScript, React, Next.js, Node.js, databases, APIs and version control.

PROJECTS

Pixelfield

- Integrated a TensorFlow Lite model into a React Native application using native bindings.
- Enabled on-device machine learning inference to improve performance and reduce dependency on server-side processing.

Phlare / Canapoy LMS

- Engineered a learning management system with seamless video-streaming integration.
- Built and integrated Node.js backend APIs to support LMS workflows, media delivery, and platform functionality.

Linked AI

- Built a full-stack matchmaking platform using TypeScript and Node.js.
- Developed deterministic scoring pipelines to support structured, explainable matching logic.
- Implemented backend services and frontend workflows for scalable matchmaking operations.

Thimble

- Shipped product features within a HIPAA-aligned workflow.
- Applied privacy-conscious API design and secure data-handling practices across sensitive user flows.

Dinex

- Built an SEO-optimized, accessibility-first website blueprint using React, Next.js, and Prismic.
- Streamlined delivery workflow, reducing implementation time from 6 months to 2 days.

HGO

- Migrated content infrastructure from Sanity to DatoCMS.
- Developed custom CMS plugins to support complex relational content models.
- Reduced hosting costs by approximately 50% through infrastructure and CMS optimization.

Techloset Admin

- Modernized an internal admin dashboard built with React, TypeScript, Firebase, and Firestore.
- Optimized Firestore query patterns, reducing database reads by approximately 50%.
- Improved dashboard responsiveness and overall user experience.

Diversifi AI

- Owned frontend architecture for a data-intensive dashboard application.
- Implemented complex state-management flows using Redux Toolkit.
- Built scalable UI patterns to support large datasets, dynamic views, and interactive analytics workflows.

CVpro

- Implemented the core canvas setup to support interactive CV design and editing workflows.
- Built a guest user flow, enabling users to explore and create CVs without immediate account registration.
- Developed dynamic CV templates with reusable, data-driven components for flexible resume generation.
- Added smooth UI animations to improve user experience and interaction quality.
- Converted the full product design from Figma into production-ready frontend code with accurate layout, styling, and responsiveness.
- Set up the complete authentication flow to support secure user access and account-based CV management.

Drive Haus App

- Worked primarily as a web developer to resolve issues in the web version of an Expo-based application.
- Contributed to feature development and bug fixes across web, Android, and iOS platforms.
- Improved cross-platform stability and supported ongoing product enhancements.

Big Bear Cabins

- Cabin rental platform wired to the exclusive Streamline API, keeping property management, reservations and live availability in sync with bigbearcabins.com.
- Implemented backend workflows to improve data consistency, booking reliability, and operational efficiency.
- Supported hospitality-focused platform requirements involving property, reservation, and availability data flows.

EDUCATION AND TRAINING

2021 – 2023 | Faisalabad, Pakistan

MODERN WEB & MOBILE APP DEVELOPMENT

Saylani Mass IT Training (SMIT)

2022 – 2026 | Faisalabad, Pakistan

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Virtual University of Pakistan

LANGUAGE SKILLS

Mother tongue(s): Urdu, Panjabi

Other language(s): English — Proficient user (Understanding C1–C2, Speaking C1, Writing C2)

HONOURS AND AWARDS

PROBLEM SOLVER OF THE YEAR – 2024

Techloset Solutions | Pakistan

Awarded for unparalleled analytical thinking, innovative solutions to critical challenges, and consistently overcoming obstacles to drive organizational success. Recognized for transforming complex issues into opportunities, boosting efficiency, and inspiring a culture of resourcefulness and collaboration.
